

## **Bio**

Jan Boström has been working for PTS since 2005, where his work has been focusing on the definition of technical requirements for licensed WAPECS bands. In this position he has been representing PTS in the development of Harmonised European technical regulation for the 3.4-3.8 GHz , 2.6 GHz and 800 MHz bands. Prior to moving to PTS Jan held a position as HW-manager at REPEATIT AB, a company developing wireless broadband systems. Before this he started his career in a slightly different field, working at Ericsson with xDSL research and during five years represented Ericsson in ADSL and VDSL layer 1 standardisation.
