Diversity Challenge 2013

Internship – Quality Assurance Alfa Laval

Actions speak louder than words. At Alfa Laval, we are every single day contributing to a more sustainable future for our planet through engineering innovation. Our global team designs and implements the refining, recycling and purifying processes that allow our customers to be better themselves. You'll find our work in leading applications for water purification, clean energy, food production, waste processing, pharmaceutical development and much, much more.

The people of Alfa Laval enjoy the freedom to pursue ideas, and the resources to see those ideas become reality, in an environment that welcomes drive, courage and diversity. The result is a company where we all can be very proud of what we do.

Alfa Laval has about 16 000 employees in more than 50 countries and works closely with customers in nearly 100 countries to help them stay ahead in the global arena.

The internship

You will be working at the Business Centre for six months in the "Quality Assurance" department. We are 12 persons working with developing, improving and maintaining our system utility (PDM/CAD) and working with analyzing product deviation. The main purpose with the analyses is to identify systematic errors, suggest and run improvement activities across the organization.

We are currently pursuing a project under the name TPQM (Total Product Quality Management), briefly described as a project where we are working with improvement activities across the organization. The foundation for this work is a consolidation of data and information from different sources (databases and reports). The data is to be analyzed from different perspectives and then put together for the work groups and their ongoing work tasks to generate results within the respective improvement areas.

The position is full time with a start date in the beginning of April or May of 2013 with flexibility to start in the fall of 2013.

This is a paid internship.

Your profile

You are most likely an engineering student with a focus towards industrial economy, logistics or mechanics.

You are open-minded with good communication skills, see challenges as possibilities and have the ability to work on a detailed level as well as see the bigger picture. You are driven, thrive on taking initiatives, enjoy analytical tasks and can contribute with extensive experience within data management.

Experience/knowledge

- Knowledge and interest in mechanics
- Academic experience within logistics
- Good english proficiency
- Good computer and systems knowledge

As the internship is a part of the diversity program through Diversity Challenge, we welcome applicants with a multicultural background or experiences.

Application:

Apply as soon as possible, but no later than November 30th, on www.diversitychallenge.se. For questions you are welcome to contact Erika Wideqvist (+46 8 555 15 731) at Academic Search who is responsible for the recruitment.

For more information about Alfa Laval, visit www.alfalaval.se.

Academic Search established Diversity Challenge in the fall of 2005 and will celebrate its eight year with the upcoming program starting this fall! The most important purpose of this program is to increase the level of diversity within the business environment and to offer talented graduates a valuable working experience at some of the most inspiring and interesting companies in Sweden.
