Title = {{Multi-tone design for out-of-band characterization of nonlinear RF
modules using harmonic sampling}},

Organization = {{IEEE}},
Abstract = {{In this paper we evaluate the generation of a multi-tone set for
characterizing the behavior of nonlinear radio frequency (RF) modules
in its out-of-band when harmonic sampling is used as digitizer. The
purpose is to provide the reader with a tool to select proper
frequencies and record length for a given application and test-bed. The
method is based on simulations and the use of Sidon sequences. The
proposed method is applicable to sparse discrete frequency multi-tones.}},

How to find PubMed-ID

The screenshot shows a PubMed search result. At the top, there is a search bar with the query: `Caregivers[Title] AND job[Title] AND satisfaction[Title] AND empowerment[Title]`. Below the search bar, the results show one article: "Caregivers' job satisfaction and empowerment before and after an intervention focused on caregiver empowerment." The article is from *J Nurs Manag*, 2010 Jan;18(1):14-23. The PMID is 20465725. The abstract is partially visible, starting with "aimed at strengthening caregivers' self-esteem and empowering them, and also to study correlations between psychological empowerment and job satisfaction." On the right side, there are sections for "Related citations" and "Search details". The "Search details" section shows the search query: `Caregivers' [Title] AND job [Title] AND satisfaction [Title] AND empowerment [Title] AND after[Title] A intervention[Title] AND`. At the bottom, there is a "Recent activity" section.
