

Anna Löfmark, RN, MSc, PhD, working at Faculty of Health and Occupational Studies, Department of Health and Caring Sciences, University of Gävle, Sweden and Stord/Haugesund University College, Department of Health Sciences, Haugesund, Norway.

My interest and main research area is clinical nursing education. The PhD thesis "Nursing students in clinical practice. Studies in independence, assessment and performance" (2000) concerned students experience of what they learned in clinical practice but also how they handled situations in nursing care. The development of an assessment form for clinical nursing education started during the doctoral studies and the first version was adopted in 1998. The development of the assessment form, now called the AssCE-form, has continued. The use of the AssCE-form has been evaluated several times and are ongoing. In Sweden the form is used in many of the nursing programmes, but also used in Norway and on Åland. International contacts and work in two countries gives opportunities e.g. to do research outside Sweden and to be a member of a Scandinavian Research Group. The teaching today concerns preceptor education in Sweden and Norway, and involvement in projects about clinical education both at the University of Gävle and the University College in Stord/Haugesund.
